<b>Total</b>	<b>\$40,000,000</b>	<b>\$20,000,000</b>	

Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.
Ensuring Safety and Security	This project would benefit the public by potentially reducing the incidence of crashes along this roadway segment, corridor, and/or intersection.

Additional Benefits	This project would benefit the traveling public by alleviating the congestion on US 27 (SR-1) and decreasing the frequency and severity of crash incidents. Currently, this corridor has a level of service of D, and has approximately 6,400 cars per day traveling on it. An additional benefit will be providing a smoother surface for travel, along with optimizing capital asset management. This project has been in the MPO's LRTP for a number of years, but funding shortfalls have prevented the project from moving forward.
