Public Benefit

Maximizing the value of Georgia's Assets

Notes

This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.

Additional Benefits

This project would benefit the public through enhancing safety through replacing the bridge and increasing the load limits to allow for increasing traffic and truck loads.
