

# Project Sheet

**Project Number:** RC07-000139      **Project Name:** Riverwatch Parkway Adaptive Signal Project

**GDOT ID:** 0011402

**Project Description:** This project would install an adaptive traffic signal system that would continuously adjust signal timing and coordination of the corridor to address fluctuations of traffic volumes through out the day. The project would be on Riverwatch Parkway from Fury's Ferry Road to River Shoals Parkway

**Regional Commission:** Central Savannah River Area

**County:** Richmond County

Phase	Total Project Cost	Total TIA Amount	Comments (Please note all cost estimates are in 2011 dollars and actual costs for all phases at year of expenditure will be higher):
PE	\$35,061	\$35,061	
CST	\$447,026	\$447,026	
UTL	\$200,000	\$200,000	
<b>Total</b>	<b>\$682,087</b>	<b>\$682,087</b>	

Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.

Additional Benefits	This project would benefit the public by providing congestion relief through improving traffic flow between Fury's Ferry Road and River Shoals Parkway with a signal system that accommodates the traffic flow. Current average daily traffic is 22,920.
