Total	\$1,358,566	\$1,358,566	

Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.

Additional Benefits	This project would benefit the public by enhancing safety by increasing the load limits, and allow for increased traffic volumes and loads by replacing the existing bridge with a new structure.
