Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.

Additional Benefits	This project would benefit the public by enhancing safety in the area by replacing the structurally deficient bridge over the Canoochee River, with a structure that meets current design and load standards. The replacing of this bridge will also benefit the public by providing a smoother surface for travel, along with optimizing capital asset management.
