

Project Sheet

Project Number: RC08-000012 **Project Name:** US Hwy 280 Bridge Reconstruction over Lake Blackshear

GDOT ID: 0012578

Project Description: Project components include construction of a new parallel 27 span AASHTO Type IV bridge over Lake Blackshear, which entails environmental documentation and implementation, striping and marking. The bridge is 2243' x 40', with a sufficiency rating of 87. This project is part of the GRIP, it is on the east end of STP -030-2(30) and ties into STP -030-2(29)

Regional Commission: River Valley

County: Crisp County

Phase	Total Project Cost	Total TIA Amount	Comments (Please note all cost estimates are in 2011 dollars and actual costs for all phases at year of expenditure will be higher):
PE	\$1,500,000	\$1,500,000	
CST	\$28,000,000	\$28,000,000	
ROW	\$500,000	\$500,000	
Total	\$30,000,000	\$30,000,000	

Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.
Additional Benefits	This project would benefit the traveling public by improving a key connectivity link over Lake Blackshear and would connect the Intermodal Center, a regional employment, retail and activity center to points west including Americus and Columbus. It will spur economic development in the region by enhancing this well known development corridor, and facilitate the flow of freight. The replacing of this bridge will benefit the public by providing a smoother surface for travel, along with optimizing capital asset management, and potentially improving safety.
