Public Benefit	Notes
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.
Additional Benefits	This project would benefit the public by creating a less congested, quicker route by utilizing and improving the existing road (Old Petersburg) as a direct route to major activity and employment centers by widening the road. Current traffic is approximately 9,520 cars per day.
